EZEQUIEL DELIPETRO

Systems Developer | SQL · API Integration · Process Automation · Data Analysis

San Antonio de Padua, Buenos Aires, Argentina | +54 9 11 3085-1825 | e.delipetro@gmail.com | linkedin.com/in/ezedelipetro | ezedeli.github.io/Proyectos

PROFESSIONAL SUMMARY

Systems Developer focused on databases, API integration and process automation. At Digitrack, as the sole developer, I migrated the company's web application to a low-code platform in 6 months using AI-assisted development. Experienced in SQL query optimization, data cleaning, ETL and Power BI dashboards. Background in Data Analytics and Data Engineering. Available for freelance projects.

WORK EXPERIENCE

Systems Developer | Digitrack | 05/2026 – Present
Buenos Aires, Argentina (hybrid)

- Sole developer responsible for migrating the company's web application to a low-code platform on a relational database, completed in 6 months with AI-assisted development.
- Optimized SQL queries that degraded as record volume grew and were slowing down the application.
- Built workers that monitor database tables and call the REST API of an external help desk system to create tickets automatically and send email notifications.
- Integrated external APIs and automated reading Excel files from the database for analysis.
- Cleaned inconsistent data and unblocked records stuck due to faulty validation processes.
- Redesigned printed tickets with AI on top of the existing printing API, without modifying it.
- Gathered business rules with management and operators to optimize production processes.

Customer Service Advisor | Swiss Medical Group | 10/2020 – 02/2024
Remote

- Selected for the Life insurance area, providing personalized service to clients and brokers.
- Represented the area in ISO quality assessments.
- Trained and onboarded new team members.

Nutritionist | Private practice, gyms and soccer clubs | 02/2023 – Present
Buenos Aires, Argentina

- Tracked body composition and athletic performance metrics to design personalized plans together with coaches.

PROJECTS

Weather data ETL | Python, Pandas, Airflow, Docker, Amazon Redshift

- Airflow-scheduled pipeline that pulls hourly data from a weather API, joins it with city information, loads it into Redshift and sends email alerts for high temperatures.

Adidas sales and performance dashboard | Power BI, SQL

- Relational data model and interactive dashboard to analyze sales, profitability and performance by region, product and sales channel.

Spanish wine market analysis | Tableau

- Dashboard with KPIs, a regional map and price trends based on number of reviews.

EDUCATION

Higher Technical Degree in Software Development | "Leopoldo Marechal" Municipal Higher Technical Institute | 03/2025 – Present

Bachelor's Degree in Nutrition | National University of La Matanza | 2014 – 2022

CERTIFICATIONS

Coder House (2024): Data Engineering · Data Analytics Career Track · Power BI · Tableau · Introduction to Data Analysis

SKILLS

Databases: SQL, stored procedures, data modeling, query optimization, data cleaning and data quality
Integration and automation: REST APIs, workers and scheduled jobs, ETL, Airflow, Docker
Development: Low-code platforms, Python (Pandas), HTML, CSS, JavaScript, C, Git, AI-assisted development
Analysis and visualization: Power BI, Tableau, Excel, descriptive statistics
Professional: Requirements gathering, communication with management and end users, training
Languages: Spanish: native · English: B2 (upper intermediate)
